

The Welltherm Vida dimmer is the ideal plug-and-play addition to all electric radiant heaters that are not fitted with integrated controls.

The dimmer is easily connected to the mains using two Schuko plugs and is controlled using the included infrared remote control or via the app.

Several dimmers can even be operated individually using the app. This feature makes even larger installations simple to manage. The external Bluetooth antenna also enables control over greater distances. The Vida is therefore ideal for use in the catering industry.

Vida Dimmer

Technical Data:

Remote control:	Yes
App control:	Yes
Power:	up to 3,000 W
Power supply:	1/N/PE 230 V
